Recommended Sales Conversation Starters

- **What do you do?** - What curriculum do you teach? Tell me more about that.
- **What's most important to you?** What do you like to achieve with your training? What are the top 1-3 things you hope your students learn & walk away with?
- **What frustrations do you have?** What challenges do you face? I've heard from other instructors that they have to carry a lot of equipment; manikins are difficult to setup/take apart/clean & lung bags are difficult to install; AED Trainers are expensive, difficult to use, and AED Trainer pads are messy and/or need to be replaced often.
